SCHOOL WARRANT

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the School district in the town of Londonderry qualified to vote in district affairs;

You are hereby notified to meet at the Town Hall in said district on the 13th day of March 1928, at 2 o'clock in the afternoon to act upon the following subjects:

1. To choose a Moderator for the coming year.
 2. To choose a Clerk for the ensuing year.
 3. To choose a Member of the School Board for the ensuing three years.
 4. To choose a Treasurer for the ensuing year.
 5. To determine and appoint the salaries of the School Board and truant Officer, and fix the compensation of any other officers or agents of the district.
 6. To hear the reports of Agents, Auditors, Committees, or Officers chosen, and pass any vote relating thereto.
 7. To choose Agents, Auditors and Committees in relation to any subject embraced in this warrant.
8. To see if the district will vote to make any alteration in the amount of money required to be assessed for the ensuing year for the support of public schools and the payment of the statutory obligations of the district, as determined by the school board in its annual report.

Given under our hands at said Londonderry this
14th day of February 1928.

Harriet J. Davenport,
Hollie L. Whittemore,
Nelson E. Smith.

School Board.

A true copy of warrant—Attest:

Harriet J. Davenport,
Hollie L. Whittemore,
Nelson E. Smith.

School Board.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Londonderry School Board:

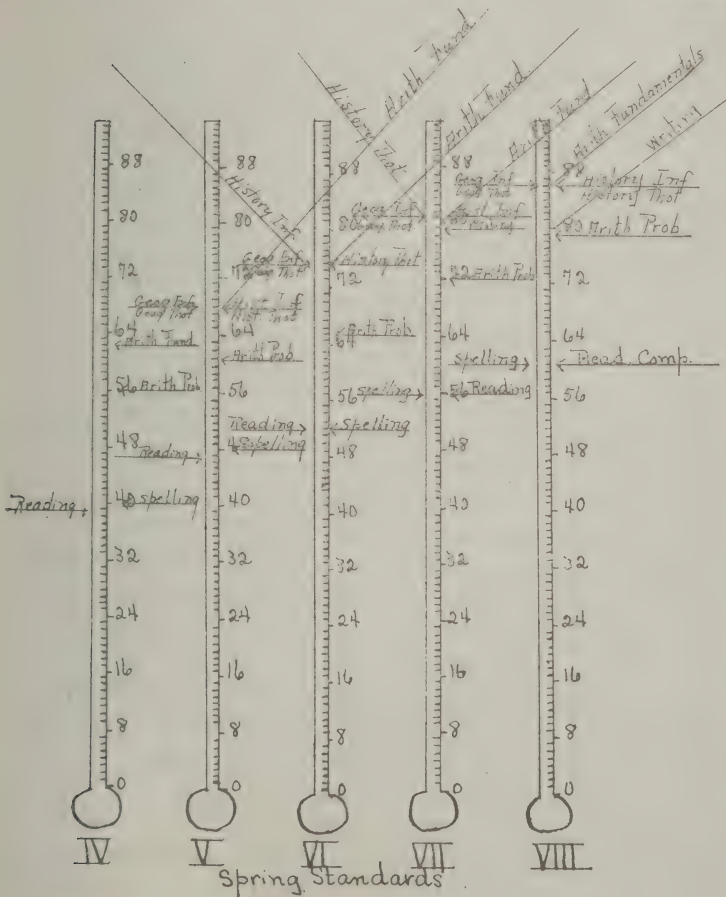

I take pleasure in presenting my eighth annual report to you. The year has been marked by sustained effort on the part of the teaching force to achieve a high level of teaching and harmonious relations with the parents and citizens by both the teaching force and school officials.

This year has been unusually crowded with work. Measurements have been made to ascertain the difference between the progress of rural school children of urban schools. The achievement of the pupils was determined by a power test given last November in spelling, reading, arithmetic, history fundamentals, history thought, geography fundamentals, geography thought, arithmetic fundamentals and arithmetic problems. The progress that the children make will be determined by making another test in the spring. The difference between the Spring tests and the Fall tests will show the gain in achievement on the part of the pupils or the progress that the pupils have made.

In order that a fair comparison of the progress made by rural and urban children may be made, an equal number of children having the same achievement power or mental age have been selected from the third, fourth, fifth, sixth, seventh and eighth grades. The side increasing its score most will be the winner in the contest.

The tests made last Fall indicate that the rural school children are holding up to as high a level of achievement as the urban children in nearly all subjects. In some subjects notable spelling the rural school pupils did even better than the pupils in single grades. I attribute the success of these pupils, who are handicapped by a less fertile environment, (they

have less books, less supplies, less equipment, less conveniences than the urban children) to a well organized course of study, frequent checking of the progress of the children by tests and the report card, and the presence of character qualities such as persistence and industry which rural life fosters. None of this progress could have been achieved without the guidance of skilled teaching.

To those who are in doubt about the validity of tests given the children last Fall and at other times to determine the progress of the children through the grades I would call attention to the chart on (page 51) which shows the standards required for the children to comply with in each grade. The thermometer is utilized for the purpose of comparing the achievements of the pupils in several of the fundamental subjects, arithmetic, spelling, reading, history, and geography. A thermometer is shown for the third, fourth, fifth, sixth, seventh and eighth grades. The heights indicated upon the thermometer show the score the child should achieve next spring when the test is given. Thus, in arithmetic problems, the third grade child should score 49, the fourth grade child 56, the fifth grade child 60, the sixth grade child 64, and seventh grade child 72, and the eighth grade child 78. In like manner the other subjects and their several standards, in the grades mentioned above, are noted upon the thermometers. Those interested may study the details of the other subjects on the chart.

Frequently teachers make educational thermometers either on charts or the blackboard. These charts enable the pupils to compare their marks with the grade standards and thus determine their several standings in the grades. Much rivalry may be developed between pupils of the same and different schools through the use of these charts.

Our teachers are all much interested in their school work. They are giving liberally their time and energy to the work of the schools. The recent tests added to an already full day's work. The scores were derived and distributed by them as a task additional to regular school work. It was necessary for them to do the scoring to enable the pupils to understand the significance of the tests. A word of commendation

for the good work of the school teacher is appreciated by them equally as much as by workers in other walks of life. Parents and citizens should visit our school rooms more often to observe the nature of the work done by our teachers and pupils.

Health Report

The school nurse reports that examinations were made of all children during the Fall term. The children were weighed, measured, tested in sight and hearing, and examined as to head and throat conditions. There were forty eight children ten per cent or more under weight. Some of the latter have been examined in the under weight clinic by Dr. Kerr of Manchester.

Seven children have been operated upon for tonsils and adenoids during the past year. A toxin anti-toxin clinic for the prevention of diphtheria was held last spring. A large number of children took this treatment. A dental clinic, which was liberally patronized, was held in March by Dr. Geo. Danforth. A number of children were taken to Dr. Jones' clinic at Manchester for orthopedic treatment, and to the underweight clinic held by Dr. Kerr at Derry. Exact figures concerning the number of children treated were lost in the recent fire so they cannot be given.

| No. of pupils examined | | Cards to | Correc- |
|---|-----|----------|---------|
| | | Parents | tions |
| No. of pupils examined | 190 | | |
| Pupils under weight | 48 | 48 | |
| Pupils with enlarged tonsils | 71 | 71 | 7 |
| Pupils with defective eyes | 10 | 10 | 4 |
| Pupils with defective ears | 6 | 6 | 3 |
| Pupils with defective teeth | 110 | 110 | |
| Pupils with orthopedic cases | 7 | 7 | 5 |
| Pupils examined at Dr. Kerr's under-weight clinic | 18 | | |

A word of commendation is due the school board for the year's activities. No. 6 school has been remodelled, a steel ceiling and blackboards installed. This is now one of the best, if not the best, school house in town. Assuring you of my appreciation of your effort in cooperating to bring about this progress,

I am,

Respectfully yours,

CARL COTTON

Superintendent of Schools.
